

The Tech

VOL. XXV. No. 2.

BOSTON, MASS., FRIDAY, SEPTEMBER 29, 1905

PRICE THREE CENTS.

DR. PRITCHETT'S WELCOME.

Addresses New Men on the Work of the Modern Engineer.

In accordance with long established custom, the new students of Technology, together with a large number of men from the upper classes, gathered in Huntington Hall yesterday afternoon at one o'clock, and were addressed by President Pritchett. After welcoming the new men to the work and fellowship of the Institute, and calling their attention to the various student activities, Dr. Pritchett spoke in part as follows in regard to the work of the modern engineer:

"Perhaps few professions have had so great an expansion of scope and influence in the last thirty years as that of the engineer, using that term in the wider sense. The great material advancement of the world and the splendid problems now waiting solution, may well make us believe that the next quarter century will see an increasing dignity and influence associated with the engineer's work. He stands more closely than any other man in direct relation with the productive side of human activity.

"I was greatly interested this summer in hearing a discussion carried on in a group of engineers which included English, German, Belgian and American engineers, concerning the scope and the future of the engineering professions. Two ideas brought out by this international discussion seemed to me very significant of the gradual transformation, of the broadening and lifting of the engineering profession. One was the effort to define the work of the engineer, the other was the increasing place which the engineer is taking as an executive.

"The opinion of this group of men was that the engineer was a man who successfully turned the forces of nature to the service of man, the civil engineer, the electrical engineer, the mechanical engineer, the chemist, the physicist, the structural engineer. The question was asked whether the military engineer who turned the forces of nature to the destruction of man could be reckoned as an engineer.

"I think that this estimate of the scope of the engineer's work is a true one; the engineer is he who successfully turns the forces of nature to human use. But what are the forces of nature? When we think of the forces of nature there suggest themselves to our minds at once the great dynamic forces with which we are familiar, the forces of the stored sunlight, electricity, steam, hydraulic power, the energy of the falling body. And besides these, those forces of nature more subtle, but none the less powerful, the chemical reaction, the energy of the bacteria, the thousand-fold transformations of the micro-organisms. All these are forces of nature with

(Continued on Page 3)

FRESHMAN DINNER.

The Entering Class will be Guests of The Tech.

On Saturday evening, September 30 a dinner, under the auspices of THE TECH, will be held at the Union. The object of the dinner is to get the Freshmen interested in the different student activities at the Institute, and used to the fact that the Union is a meeting place that can, and should, be used on every possible occasion. The Freshmen will also at this time have a chance to meet a great many of their classmates, and this opportunity for good comradeship and sociability should not be neglected.

There will be many speakers present to tell of the happenings of the four years spent at the Institute as well as the ideas and aims that the professors expect of students here. President Pritchett has consented to be one of the speakers, and Dr. Tyler and Prof. Merrill will also say a few words during the course of the evening. Among those who will say something about the student interests will be Mr. Mahan, the coach of the Track Team, who will speak on athletics at Tech and the benefits derived from them. J. T. Lawton will tell of the doings of the Musical Clubs and what is expected of men after they have joined. J. H. Leavell, '07, will speak on Field Day, and should arouse some great enthusiasm on that, at present, all-important subject. A. H. Donnewald, Editor-in-Chief of *Technique*, '07, will explain what *Technique* is and what it means to the college and to the individual classes. A. Macomber, '07, will speak on the Tech Show. C. T. Bartlett, Editor-in-Chief of THE TECH, will tell what the tri-weekly at the Institute is trying to do, and how it is trying to do it.

The dinner is to be entirely informal, and the number of tickets have been limited to prevent the Union from being so crowded as to be uncomfortable. These tickets may be obtained at THE TECH table in Rogers Corridor, or at the News Bureau. The price will be 50 cents.

Y. M. C. A. RECEPTION.

All Freshmen and new students at the Institute are cordially invited to the reception given tonight, at 8 o'clock, by the Technology Young Men's Christian Association, at the Tech Union. Dr. Pritchett will give an address and Dr. McElveen of the Shawmut Church will speak. Of the undergraduates, A. H. Donnewald will speak on *Technique*, W. J. Knapp on Athletics, H. C. Henrici on the Musical Clubs. President Orcutt of the Association will preside and Mr. Don S. Gates the new graduate secretary will outline his work for this year. Refreshments will be served.

The Freshman Football team starts practice Monday.

FRESHMEN ORGANIZED.

Chairman and Managers of Athletic Teams Elected.

"The earliest start any class ever had," was what President J. H. Leavell, '07, told the class of '09 as he started to organize them Wednesday afternoon.

After Major Wheeler had told the men about military science he stated that students engaged in athletics would be excused from drill whenever games came on Wednesday afternoon, then thanked the class and turned them over to President J. H. Leavell, '07, for organization.

President Leavell stated that the class was being organized sooner and with better opportunities than any class that had gone before and called for nominations for a temporary class chairman.

Nominations were: M. R. Sharff, Aldrich Blake. M. R. Sharff was elected. The nominations for secretary were: W. W. King, E. R. Hamilton. W. W. King was elected by a large majority.

Managers were elected for the football, relay and tug-of-war teams.

For manager of the Football Team the nominations were: H. M. Cook, M. Belcher, A. L. Moses. M. Belcher received the largest number of votes.

Mr. Woodard, Manager of the '07 football team, was called upon to tell the class of '09 what they must do to win the field day. He told them that hustling would be necessary; and that, unless they developed this requirement the Soph's would defeat them overwhelmingly. He said that every advantage that could be given them was theirs; a good coach, a good schedule, and excellent prospects for their team.

The election was then resumed. W. B. Jenkins and H. Whittiker were nominated for Manager of the Relay team. W. B. Jenkins withdrew, allowing H. Whittiker to be chosen by acclamation.

The nominations for Manager for the Tug-of-war were: F. Bundy, H. A. Bennet and Dickerman. A. Bennet was elected.

After shaking the roof of Huntington Hall with cheers for '09 the meeting adjourned.

FENCING.

That Tech will get into the Inter-collegiate Fencing Association, seems now certain. If the team continues its good work for two years to come, we are assured of being admitted to membership. It is important that the team should organize at once. All men who have had any experience at fencing, should leave their names at the Cage for S. R. Miller, '07.

The Lunch Room in Pierce Building is open from 11:30 A.M. to 2 P.M.

Trials for the Mandolin Club will be held on Wednesday, October 4. Every one playing either guitar or mandolin should come out.

CALENDAR.

FRIDAY, SEPTEMBER 29.
1.05 P.M. Sophomore Class. Meeting in Huntington Hall.
8.00 P.M. Y. M. C. A. Reception to Freshmen at Tech Union.
SATURDAY, SEPTEMBER 30.
1.40 P.M. Hare and Hound Chase. Leave Back Bay Station.
2.00 P.M. Sophomore Football Practice at Tech Field.
6.00 P.M. TECH Dinner to Freshmen at Tech Union.
MONDAY, OCTOBER 2.
4.00 P.M. Mandolin Club's First Rehearsal in 31 Rogers.

TENNIS MEETING.

There will be a meeting of all interested in tennis, today at 1 P.M., in 11 Rogers. The election of officers and other important matters will be taken up.

1908 MEETING.

The Sophomore Class will hold a meeting in Huntington Hall today, at 1 P.M. Every Second Year man must be present. Important!

NOTICES.

Entries for the fall Tennis Tournament may be left at the Cage for P. B. Stanley. Entrance fee for singles, 50 cents. For singles and doubles 75 cents. Entries will close October 2, 1 P.M.

All men playing musical instruments are requested to leave their names at the Cage for C. F. Willis, '06, with the view of forming an Institute band. Freshmen playing in the Band are excused from drill.

The first Hare and Hound chase of this year will be held tomorrow. Trains leave Back Bay at 1.40 P.M. Fare for the round trip 20 cents.

1908 FOOTBALL.

The Sophomore Football Team will begin work next Saturday at Technology Field. Harry Ball, who coached the team last year, has been secured again. The team is determined to wipe out last year's defeat by running up a large score on this year's Freshman team. A hard schedule has been arranged, and the present outlook for the Sophomores is very encouraging. Most of last year's team are back.

John Tobin, '08, manager of the team, has arranged the following schedule: October 7, Waltham at Waltham; October 11, Malden at Malden; October 13, Brookline at Tech Field; October 14, Bridgewater at Bridgewater; October 17, De Meritt at Tech Field; October 21, Wellesley at Wellesley; October 26, Medford; October 28, Roxbury Latin; and October 31, Boston Latin, the last three games to be played at Technology Field.

The Tech

Published every Monday, Wednesday and Friday during the college year (from September to June), by students of the Massachusetts Institute of Technology.

Entered as second-class matter October 6, 1904, at the post office at Boston, Mass., under the Act of Congress of March 3, 1879.

Friday, September 29, 1905.

WILLIAM A. NICHOLS, PRINTER, 208 SUMMER ST., REAR

We wish to call attention to the error in our last issue which referred to the Faculty vote on the tentative plan as being fifty-six to "fifty-seven," instead of fifty-six to *seven* as it should evidently have been.

We wish to make a direct personal request for men to fill the editorial and news positions of THE TECH.

Men of all classes are eligible, but we want Sophomores and Freshmen in particular, because their tenure of office will be longer.

When we urge you to come out for THE TECH, we do not ask for a great deal of your time. Our departments are so systematized that the news comes with little effort.

We do, however, offer you great benefits. There is no way you can become acquainted with school affairs and school men so quickly and agreeably. You will have opportunities to know the professors and the men who have risen to leadership in the undergraduate life. You will gain experience in meeting men. You will have general executive work, a training of great value. You will have practice in writing, in presenting ordinary facts in a clear way, a practice far more valuable than any other sort of literary work, for use in daily life.

Now is a good time to start. We are short of our usual number both in editorial and news work, and want more good men. Come out and do something for the Institute and let the Institute help you. Be an all-around man.

The entering class should remember that it is strictly against the rules passed by a joint committee of the Classes of 1903 and Freshman 1904 for Freshmen to wear any preparatory school insignia. This matter of college etiquette, which, unfortunately, is frequently violated through ignorance, caused the adoption of the following rule:

"No Freshman shall wear any hat, cap, sweater, jersey or sleeveless shirt bearing any preparatory school numerals, initials or insignia of any variety. However, sweaters or jerseys bearing such insignia may be worn inside out, or with the insignia on the back of the wearers. Preparatory school pins, if worn at all, should be worn so as not to be in sight."

Should 1909 adhere strictly to these rules, 1908 will not be called upon to enforce them.

The Class of 1909 should not neglect the opportunity offered to them by THE TECH in its dinner on Saturday night of this week. Freshmen need acquaintanceship with each other; no opportunity could be better than such an informal entertainment. Short talks by representatives of the Faculty and the school organizations will give the new men an insight into Institute affairs and ideals. The process of forming Class spirit will be begun. This is the formative period, and the acquaintanceships of the next few days may be the guiding forces of a man's life during the next four years.

NEW ASSISTANTS.

The new assistants in the Electrical laboratory are: H. C. Crane, J. C. Damon, G. I. Rhoades, M. I. T. '05, VI. H. A. Wentworth, M. I. T. '05, VIII. G. A. Rodenbaeck.

Technology students will be welcomed at Central Church corner of Berkeley and Newbury Streets, near the Rogers Building. Morning Service at 10.30. Young People's Discussion at 12. Musical Vespers at 4. Half-hour Daily Service, with organ music, at 4.30, except Saturday.

DR. PRITCHETT MEETS 1909.
 (Continued from Page 1)
 which the engineer in his work of construction, transportation and sanitation deals.
 "Let me suggest another force of nature no less powerful, no less important—the dynamic importance of the social energy. The engineer must deal not alone with these material forces, he must deal each day and hour with that subtler force which makes contact possible between man and man; that sympathy and understanding of men which enables the leader to get out of men the best that is in them; the attitude of mind to enter into other men's thoughts and to share their point of view; the sense of fellowship which invites confidence; in a word, knowl-

edge and fellowship with one's fellows. Let me urge upon you the fact that this also is one of the forces of nature, one of the greatest, and one with which you must reckon at every step of your work and at every point in your career. Of all the forces of nature what one might call the social energy, the dynamic value of a living, sympathizing, inspiring member of the social order is the greatest, and one which the engineer, therefore, cannot neglect."

First trials for the Glee Club will be held at the Union Saturday, October 7, at 1 P.M. All those wishing to try for this club should leave name, with class and part trying for, at the Cage for

Owing to our immense direct importations we can offer you your favorite cigar at a price far below what you ever paid before. This department is just within the Essex Street entrance, making it as convenient as any tobacconist's in town.

BOSTON'S NEW STORE

Restaurant

Our magnificent restaurant will prove one of the greatest of attractions to Tech men. It is one of the few places where a lady may be taken for a luncheon before the matinee, and in one part smoking is permitted.

Strong and Artistic Furnishings for the Tech Man's Room

Whether you have to fit out your room complete or are planning to add a few new bits to last year's equipment, you will find that the New Store can show you carefully made, well-designed furniture, rugs, carpets and hangings at prices way below what exclusive stores must ask.

Every bit of our stock has been brought to Boston since Graduation, everything is as new as it can be, the furniture is largely of the famous Grand Rapids make, the rugs and carpets are selected by experts, and the markets of America, Europe and Asia were ransacked to bring to this city the newest and best of decorations. Solid and ready to stand rough usage is what the college room demands; that is just what we want to show you.

Furniture

[Fourth Floor]

The entire fourth floor is devoted to the finest display of new furniture that can be wished for. The Mission chairs and couches alone are worth a visit to the store. This is an especially strong design for the college room as it seems built especially to stand the rough treatment that it is bound to suffer. We have big, roomy arm chairs, just the thing to draw up to the fire for a quiet smoke. There are hundreds of tables, from dull mahogany to plain pine; brass, iron and wooden beds; bureaus, shaving stands and wash stands; hat trees, smoking sets and shoe boxes; lounges, couches and couch beds. Not only a few styles of each but an infinite variety from which the most particular can make a satisfactory choice.

We can fit any purse. If you room in the most exclusive flat house we can give you the richest of finishes and the most delicate designs while for the man who works his way we have inexpensive lines, but each table, chair or couch is made solidly and well and will outlast the stiffest and longest college career.

Rugs, Carpets and Hangings

[Third Floor]

A bright, cheery rug is absolutely essential to the comfort of the average college quarters. In our rug department we carry every kind, from tiny domestics to the most superb and rich creations of Eastern looms those antique beauties made years before rug making degenerated from an art to a trade. One of the favorites will be the Yaprack, a replica of the first rugs imported to America. It is a gorgeous affair in red and black—a man's rug if ever one was made.

Our carpets are of the very latest weaves and colorings, and from our vast stock you can match any color scheme that you may plan for. If you prefer matings, some of the finest of American and Japanese work is at hand to choose from. Portieres and hangings of all kinds are in the upholstery section of this floor, together with couch covers and screens and in the adjacent art department are the newest sofa pillows and table coverings. Pictures and art prints are ready for hanging and the choicest of bric-a-brac is displayed in the basement.

Contract Department

[Third Floor]

Many an Institute man will prefer to have his room fitted up for him. This we are prepared to do, furnishing every article. At the contract office, callers are always welcome and we are ready to make estimates, placing you under no obligations whatever. It is an immense relief to many to feel that the details of his "housefurnishing" can be taken care of by others. We prepare and install everything that a man may need in the way of furniture, upholstery, carpets, hangings, bed-clothes, and if he wishes it, an entire outfit from window-seat to soap.

The work is in charge of a man long trained to this service, an expert decorator and a connoisseur in all pertaining to furniture. For years he has done contract furnishing for Harvard students and no man in the country is better acquainted with their needs and ways. He knows what the college man must have and we have the stock to fill the bill. Do not hesitate to ask for figures, you will find that the Siegel system of buying gives you the benefit of wholesale prices.
